PROJECTS

Car Dealing Platform
Aug 2025 - Present

Built a full-stack car dealing platform where users can buy new cars and sell their old ones. The front-end was developed using React, while the back-end was implemented with Node.js, Express.js, and MongoDB. The system includes REST APIs for all CRUD operations and user interactions, and an admin panel for managing car listings and platform modifications. Additionally, a secure payment gateway was integrated to facilitate transactions for car purchases.

Flipkart Clone Project
Jul 2025 - Sept 2025

Built a Flipkart clone with user authentication using JWT tokens, enabling secure login and operations. Developed using React, Node.js, Express.js, MongoDB, and REST APIs, with admin functionality for managing products and users. Integrated a **payment gateway** to handle secure transactions.
